Sub :- Environment Clearance - Quarry project of M/s Thomson sands & Metals Pvt. Ltd is situated at Erumely South Village, Erumely Panchayath, Kanjirappally Taluk, Kottayam District, Kerala - Compliance Report - First Half - Reg.

Respected Sir,

The Quarry (Building stone) project was accorded Environmental Clearance for 4.23 Ha. by order No. 936/SEIAA/EC4/4473/2015 dated 08-02-2017 by State Environmental Impact Assessment Authority, Kerala. The compliance report of First half (April 2020 –September 2020) to the specific and general conditions of the Environment Clearance order is enclosed.

Thanking you,

Yours respectfully,

For M/s Thomson sands & Metals Pvt. Ltd

Mr. K. V Abraham Managing Partner

INTRODUCTION

The quarry project of **M/s Thomsun Sands & Metals Pvt. Ltd is** situated at Survey No. 120/1-23 at Erumely South Village, Erumely Panchayath, Kanjirappaly Taluk, Kottayam District, Kerala.

The quarry project was accorded with the Environmental Clearance (EC) by State Environmental Impact Assessment Authority on 08-02-2017. As part of general condition No.37 of Environmental Clearance order, half yearly compliance report needs to be submitted by the project proponent. The compliance report of First half to the specific conditions and general conditions of the Environmental Clearance order for the period of April 2020 – September 2020 is being submitted.

PART - A - SPECIFIC CONDITIONS

1	Should be Fenced all around.	Complied	ĺ

Compliance:

To demarcate the lease area, the project proponent has installed fencing around the project site.

2	The approach road needs widening and surfacing even though it is	Complied
	located within the estate.	

Compliance:

To contain the trouble free transportation of materials, the project proponent has widened the approach road even though it is located in the estate.

3	The limited patch of natural vegetation seen in the upper part	Noted
	adjacent to the proposed area should be preserved as such.	

Compliance:

The project proponent will preserve the limited patch of natural vegetation seen in the upper part adjacent to the proposed area.

4	A small plot should be set apart for the rehabilitation of rare	Noted
	plants seen in the area.	

Compliance:

The project has set a small plot in the project site for the rehabilitation of rare plants seen in the area.

5	The entire quarry should be provided with catch water drain. The	Being
	storm water from the upper slopes to be channelized into the	Complied
	drain and clarified before it is let out.	

The project proponent will ensure that all storm water from the mining area is flowing in to the pond created at mining area. The project proponent has started to create good drainages where it is necessary in the lower slopes of the project area for storm water management.

6	A RWH structure should be created for the storage of rain water.	Complied	
---	--	----------	--

Compliance:

To harvesting rain water, the project proponent has been developing rain water harvesting pond in the project site to collect rain water falling in the entire mining area.

GENERAL CONDITIONS

GENERAL CONDITIONS

01	Rain Water Harvesting capacity should be installed as per the	Complied
	prevailing provisions of KMBR / KPBR, unless otherwise	
	specified.	

Compliance:

The project proponent has developed rain water harvesting pond in the quarry site as Rain Water Harvesting structure. The water from pond is mainly used for watering of plants, wetting of roads and sprinkler system for contain dust emission. Rain water is mainly used for gardening, wetting of roads, Washing of sand and splashing for contain dust emission.

02	Environment Monitoring Cell (EMC) as agreed under the affidavit	Complied
	filed by the proponent should be formed and made functional.	

Compliance:

The Environmental Monitoring Cell (EMC) has formed to evaluate and monitor specific and general conditions stipulated in the Environmental Clearance (EC) order.

03	Suitable avenue trees should be planted along either side of the	Complied
	tarred road and open parking areas, if any, inclusive of approach	
	road and internal roads.	

Compliance:

The project proponent planted various tree saplings and native species in the project site as avenue trees and at parking area. To reduce air and noise pollution, the project proponent has planted various avenue trees along either side of the road. There is natural vegetation including trees, shrubs and climbers to reduce pollution.

04	Maximum possible solar energy generation and utilization shall	Complied
	be ensured as an essential part of the project.	

The project proponent has installed solar street lights to maximum possible solar energy generation and utilization.

05	Sprinklers shall be installed and used in the project site to	Complied
	contain dust emissions.	

Compliance:

To prevent dust emission, sprinklers are installed in the project site. The project proponent is splashing water on roads using a tanker vehicle.

06	Eco-restoration including the mine closure plan shall be done at	Noted
	the own cost of the project proponent.	

Compliance:

The eco restoration and the mine closure plan will be done at the own cost of the project proponent. The project proponent started to plant various saplings in and around the project site

07	At least 10 percent out of the total excavated pit area should be	Will be
	retained as water storage areas and the remaining area should be	complied
	reclaimed with stacked dumping and overburden and planted	
	with indigenous plant species that are eco-friendly, if no other	
	specific condition on reclamation of pit is stipulated in the EC.	

Compliance:

The project proponent will retain 10 percent of total excavated pit as rain water storage area. The remaining area will be reclaimed with stacked dumping of overburden and top soil. As part of its eco – restoration plan, the project will plant indigenous plant species that are eco – friendly on the reclaimed area.

08	Corporate	Social	Responsibility	(CSR)	agreed	upon	by	the	complied
	proponent	should	be implemented						

As part of Corporate Social Responsibility (CSR)/ Corporate Environmental Social Responsibility (CER) the project proponent spent amount in various sectors

- 350 Food kits worth Rs. 850/packet to 175 families at 2 times. Total cost Rs. 300000
- 2) 10 Nos(Rs.10000/1Nos) smartphone given to nearest school for online study of students. Total cost Rs.100000

09	The lease area shall be fenced off with barbed wires to a	Complied
	maximum height of 4ft around, before starting of mining. All the	
	boundary indicators (boards, stores, markings etc) shall be	
	protected at all times and shall be conspicuous.	

Compliance:

The project proponent has installed fencing around the area where lease obtained. The complete installation of barbed metal wire fencing around the mining area is with height of 4 ft.

10	Warning alarms indicating the time of blasting (to be done at	Complied
	specific timings) has to be arranged as per stipulations of	
	Explosive Department.	

Compliance:

As per the stipulation of Explosive department and State Environment Impact Assessment Authority the project proponent has installed warning alarms in the quarry site.

11	Control measures on noise and vibration prescribed by KSPCB	complied
	should be implemented.	

To reduce noise and vibration, the following measures are being adopted in the project site.

- Proper maintenance of machinery and equipments
- ➤ The machineries like breaker and excavator has well sound proof cabin so that the machine operators can work without stress due to the sound.
- Personal protective devices i.e., ear plugs are provided to workers working in high noise areas.
- The mining activity held in day time only.
- Noise level at quarry site checked periodically.

12	Quarrying activities should be limited to day time as per KSPCB	Complied
	guidelines/specific conditions.	

Compliance:

Quarrying activities are limited to day time only as per KSPCB guidelines.

13	Blasting should be done in a controlled manner as specified by	complied	1
	the regulations of explosives department or any other concerned		l
	agency.		İ

Compliance:

The blasting is done in controlled manner by using ordinary, electric delayed detonators and NONEL. All blasting activities are carrying out with the specified regulations of explosive department.

14	A licensed person should supervise/control the blasting operations.	Complied
----	---	----------

Compliance:

The project proponent has appointed licensed person in the site to supervise/control exploitation of minor minerals including blasting at the project site.

15	Access roads to the quarry shall be tarred to contain dust	Complied
	emissions that may arise during transportation of materials.	

To reduce emission of dust through the vehicle movement, the access road from the entrance of project site to quarry has tarred and maintaining in good manner. The project splashes water on the road to arrest the dust production during summer season.

16	Overburden materials should be managed within the site and	complied	ì
	used for reclamation of mine pits as per mine closure plan/		ì
	specific conditions.		Ì

Compliance:

The overburden and topsoil is managed within the site. This is used for plantation, haulage roads and land filling in the lease area. To conserve top soil grass is planted.

17	Height of the benches should not exceed 5m, and width should Co	omplied
	not be less than 5m, if there is no mention is the mining	
	plan/specific conditions.	

Compliance:

As part of safety, the project proponent conducts mining by creating benches. The benches will not exceed 5 meters of height. The project maintains the width of benches minimum of 5 meters.

18	Mats to reduce fly rock blast to a maximum of 10 PPV should be	Noted
	provided.	

Compliance:

The mat is using during blasting time to prevent fly rock. The correct quantity of explosive is used under the supervision of qualifies person.

19	Maximum depth of mining from general ground level at site shall	Will b	е
	not exceed 10m.	complie	d

The mining depth will not exceed beyond 10 meter from the general ground level.

1	20	No mining ope	rations should be carried out at places having a	Noted
		slope greater	than 45 ⁰ .	

Compliance:

There is no area seen with slope greater than 45⁰ in the area where Environment Clearance and Lease is obtained.

21	Acoustic enclosures should be provided to reduce sound	complied
	amplifications in addition to the provisions of green belt and	
	hollow brick envelop for crushers so that the noise level is kept	
	within prescribed standards given by CPCB/KSPCB.	

Compliance:

To reduce the impact of sound to the labours in the unit, the project has provided ear plugs. Vegetation around the mining area will help to reduce noise and air pollution. This helps the noise level kept within prescribed standards. The project proponent is trying to enhance the vegetative cover by planting more tree saplings.

22	The workers on the site should be provided with the required	Complied
	protective equipments such as ear muffs, helmet, etc.	

Compliance:

As part of safety the project proponent has provided adequate Personnel Protective Equipments (PPE) such as helmets, ear plugs, safety belts, glows, etc. to the labours in working site.

23	Garland drains with clarifiers to be provided in the lower slopes	Complied
	around the core area to channelize storm water.	

The project proponent has provided Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.

24	The transportation of minerals should be done in covered trucks	Complied
	to contain dust emissions.	

Compliance:

All vehicles with loaded materials are going outside as covered trucks to contain dust emissions.

2	5	The proponent should plant trees at least 5 times of the loss that	Complied
		has occurred while clearing the land for the project.	

Compliance:

The project proponent has been planting various saplings in the project area as a compensation of loss of trees while clearing the land for mining.

26	Disposal of spent oil from diesel engines should be as specified	complied
	under relevant Rules/Regulations.	

Compliance:

The used oil was sold to the approved recyclers as specified under relevant Rules/Regulations.

2	7	Explosives should be stored in magazines in isolated place	Complied
		specified and approved by the explosives department.	

The Explosives are stored in magazine. The magazine is situated in an isolated place specified and approved by the explosives department.

28	A minimum buffer distance of 100m meter from the boundary of	complied	
	the quarry to the nearest dwelling unit or other structures, not		
	being any facility for mining shall be provided.		

Compliance:

The project proponent has left minimum buffer distance of hundred meters from the boundary of the quarry to the nearest dwelling unit. The distance of the nearest house was 500 meter form the quarry, the KSPCB condition is 50 meter.

29	100	m	buffer	distance	should	be	maintained	from	forest	Noted	
	bour	ndaı	ies.								

Compliance:

There is no forest near to the project site.

30	Consent from Kerala Pollution Control Board under Water and	Complied
	Air Act(s) should have been obtained before initiating activity.	

Compliance:

The project proponent has obtained consent from KSPCB under Water and Air Act(s). The copy of certificate of "Consent to Operate" (Renewal) from Kerala State Pollution Control Board is provided in **Annexure No.1.**

31	All other statutory clearances should have been obtained, as	
	applicable, by project proponents from the respective competent	Complied
	authorities including that for blasting and storage of explosives.	

The certificates obtained from concerned statutory authorities are enclosed in

Annexure No. 1, 2, 3, 4 & 5

- 1. The consent from PCB
- 2. Environmental Clearance
- 3. Explosive License
- 4. Panchayath License
- 5. Lease order from Dept. Mining and Geology.

32	In the case of any change(s) in the scope of the project, extent	Will	be
	quantity, process of mining technology involved or in any way	compli	ied
	affecting the environemental parameters/impacts as assessed,		
	based on which only the EC is issued, the project would require		
	a fresh appraisal by this Authority, for which the proponent		
	shall apply and get the approval of this Authority.		

Compliance:

At present there is no change in the scope of the project. The project proponent will apply for Environmental clearance in the case of any change(s) in the scope of the project.

33	The Authority reserves the right to add additional safe guard	Noted
	measures subsequently, if found necessary, and to take action	
	including revoking of the environment clearance under the	
	provisions of the Environmental (Protection) Act 1986, to ensure	
	effective implementation of the suggested safeguard measures in	
	a time bound and satisfactory manner.	

Compliance:

The project proponent is aware and agreed with right of authority to add additional safe guard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the

Environmental (Protection) Act 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.

The stipulations by Statutory Authorities under different Acts and Noted Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act 1981, The Environment (Protection) Act, 1986, the public liability (Insurance) Act, 1991 and EIA notification, 2006.

Compliance:

The stipulated orders and directions under different act and notification including EIA notification will be scrupulously followed. A brief list of various Acts and notifications which are followed by the proponent is given below

- ➤ Kerala Minor Mineral Concession Rules, 2015.
- > Mines Act, 1952
- > Explosive Rules, 2008
- ➤ Kerala Panchayat Raj Act, 1994
- Central Ground Water Authority
- ➤ Water Pollution (Prevention & Control) Act, 1974
- > Air Pollution (Prevention & Control) Act, 1981
- > Environment Protection Act, 1986
- > EIA Notification, 2006 / 2009
- ➤ The Kerala Promotion of Tree Growth in Non-Forest Areas (Amendment) Act, 2007.
- The project proponent should advertise in at least two local news papers widely circulated in the region, one which (both advertisement and the newspaper) shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the Department of Environment and Climate Change, Govt. of Kerala and may also be seen on the website of the Authority at www.seiaakerala.org. The advertisement should

be made within 10 days from the date of receipt of the Clearance letter and the copy of the same signed in all pages should be forwarded to the office of this authority as confirmation.

Compliance:

The project proponent advertised in two local news papers widely circulated in the region, one which in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the Department of Environment and Climate Change, Govt. of Kerala and may also be seen on the website of the Authority at www.seiaakerala.org. The advertisement made within 10 days from the date of receipt of the Clearance letter and the copy of the same signed in all pages was forwarded to the office of this authority as confirmation

A copy of the clearance letter shall be sent by the proponent to concerned Grama/District Panchayath / Municipality / Corporation / Urban Local Body and also to the Local NGO, if any from whom suggestions / representations, if any were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.

Complied

Compliance:

A copy of the Environment Clearance letter was submitted to the Panchayat Office. The copy of Environmental clearance is uploaded in the website.

The proponent shall submit six monthly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the respective Regional Office of MoEF, Govt. of India and also to the State Environment Impact Assessment Authority (SEIAA) office.

complied

The compliance report is regularly submitted along with the results of monitored data to the State Environmental Impact assessment Authority, Kerala and the Regional Office of MoEF&CC, Bangalore as Email. The results of monitored data are provided at **Annexure No. 6, 7 & 8.**

38	The details of Environmental Clearance should be prominently	Complied
	displayed in a metallic board of 3 ft x 3ft with green background	
	and yellow letters of Times New Roman font of size of not less	
	than 40. Sign board with extent of lease area and boundaries	
	shall be depicted at the entrance of the quarry, visible to the	
	public.	

Compliance:

The details of Environmental Clearance are prominently displayed in a metallic board of 3 ft x 3ft with green background and yellow letters of Times New Roman font of size of not less than 40. Sign board with extant of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public.

39	The proponent should provide notarized affidavit (indicating the	Complied
	number and date of Environmental Clearance proceedings) that	
	all the conditions stipulated in the EC shall be scrupulously	
	followed.	

Compliance:

The proponent has provided notarized affidavit (indicating the number and date of Environmental Clearance proceedings that all the conditions stipulated in the EC shall be scrupulously followed.

40	No change in mining technology and scope of working should be	Noted
	made without prior approval of the SEIAA, No further expansion	
	or modification in the mine shall be carried out without prior	
	approval of the SEIAA, as applicable.	

At present, the project proponent is not intending to expand the area of mine, technology and scope of working. If the project proponent wants to expand its scope the project proponent will appear in front of SEIAA for Environment Clearance.

41	The project proponent shall ensure that no natural water course	Complied
	and/or water resources shall be obstructed due to any mining	
	operations. Necessary safeguard measures to protect the first	
	order streams, if any originating from the mine lease shall be	
	taken.	

Compliance:

There is no such natural water course or thodu is flowing along the project site. The project proponent will ensure the natural runoff of storm water. No stream is originating from the lease area.

42	Monitoring of Ambient air Quality to be carried out based on the	Complied
	notification 2009, as amended from time to time by the Central	
	Pollution Control Board. Water sprinkling should be increased at	
	places loading and un loading points & transfer point to reduce	
	fugitive emissions.	

Compliance:

The project proponent has monitored the ambient air quality as per National Ambient Air Quality Standard (NAAQS), during the time of appraisal of the project. The project proponent is intending to increase splashing of water and installation of sprinklers at loading, unloading and transfer points.

43	The top soil, if any, shall be temporarily be stored at earmarked	complied
	site(s) only for the topsoil shall be used for land reclamation and	
	plantation. The Over Burden (OB) generated during the mining	
	operations shall be staked at earmarked dump site(s) only. The	
	maximum height of the dumps shall not exceed 8m and width	

20m and overall slope of the dumps shall be maintained to 45°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the bump. The entire excavated area shall be backfilled. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.

Compliance:

The natural resources like top soil and overburden is being stacked in a designated place within the project site. Only topsoil will be used for plantation. Overburden will be used for landfill and to construct haulage roads in the mining area. The excess will be stored in a designated place as per the direction of State Environment Impact Assessment Authority (SEIAA).

Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc., The drains shall be regularly de silted particularly after monsoon and maintained properly.

complied

Compliance:

The project proponent has constructed effective garland drains to catch all the storm water during the time of monsoon season. These channels will be directed to the rain water collection pond. All sediments and silts will be settled at the bottom of the pond and only cleared water let out.

45 Effective safeguard measures such as regular water sprinkling complied shall be carries out in critical areas prone to air pollution and having high levels of PM₁₀ and PM_{2.5}, such as haul road, loading an un loading points and transfer points – it shall be ensured that

the Ambient Air Quality Parameters confirm to the norm prescribed by the Central Pollution Control Board in this regard.

Compliance:

The project proponent is regularly checking the pollution of all vehicles in the site and spraying water in critical areas prone to air pollution with the help of vehicle. The project proponent will fix sprinklers in critical area to reduce the dust emission such as loading and unloading points, haul roads and transfer points. The ambient air quality is monitoring with the help of an approved laboratory.

46	Fugitive dust emission from all the sources should be controlled						
	regularly. Water spraying arrangements on haul roads, loading						
	and unloading and at transfer point should be provided and						
	properly maintained.						

Compliance:

The project proponent is regularly spraying water in critical areas prone to air pollution with the help of vehicle and sprinklers. The project proponent will increase the number of sprinklers in critical area to reduce the dust emission such as loading and un - loading points, haul roads and transfer points.

47	Measures should be taken for control of noise levels below 85	complied
	dBA in the work environment.	

Compliance:

The main sound generating activities are the playing of jack hammer, breaker, vehicles and blasting operations. The level noise from all these activities will not go beyond 85dBA. The project proponent will take appropriate action to reduce the sound by employing possible measures.

48	A separate Environmental Management Cell with suitable qualified	Being				
	personal should be set up under the control of a senior executive, who					
	will report directly to the Head of the Organization.					

To monitor all conditions stipulated in the Environment Clearance and environment Management Plan, the project proponent has constituted an Environment Monitoring Cell.

49	The funds earmarked for environmental protection and CSR	Being
	activities should be kept in separate account and should not be	complied
	diverted for other purpose. Year wise expenditure should be	
	reported to the State Environment Impact assessment authority	
	(SEIAA) office.	
		i

Compliance:

The project proponent could execute many activities under Corporate Social Responsibility (CSR) for community development. To implement these activities in a good manner, the project proponent will open an account for keeping the funds earmarked for environmental protection and CSR.

50	The Regional Office of MoEF &CC located at Bangalore shall monitor						
	compliance of the stipulated conditions. The project authorities should						
	extend full cooperation to the officer(s) of the regional Office by						
	furnishing the requisite data/information/ monitoring reports.						

Compliance:

The project proponent will extent all possible cooperation to the officers form regional office of MoEF & CC and can produce all data/information/reports when they are asking for.

51	Any appeal against this environmental clearance shall lie with the	Noted
	National Green Tribunal, if preferred within a period of 30 days as	
	prescribed under section 16 of the National Green tribunal Act, 2010.	

52	Concealing the factual data or submission of false/ fabricated data	Noted
	and failure to comply with any of the conditions mentioned above	
	may result in withdrawal of this clearance and attract action under	
	the provisions of Environment (Protection) Act, 1986.	

The SEIAA may revoke or suspend the order, for non implementation of any of the specific or this implementation of any of any of the above conditions is not satisfactory. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further condition in the interest of environment protection.

Compliance:

The project proponent is willing to implement the conditions stipulated in the Environment Clearance order. The project proponent can execute all possible measures in the project site for the conservation of environment.

54	The above conditions shall prevail not withstanding anything to			
	the contrary, in consistent, or simplified, contained in any other			
	permit, license on consent given by any other authority for the			
	same project.			

Compliance:

The project proponent will give priority to the conditions stipulated in the Environment clearance Order for its execution.

55	This order is valid for a period of 5 years or the expiry date of mine	Noted
	lease period issued by the Govt. of Kerala, whichever is earlier.	

56	The environmental clearance will be subject to the final order of	Noted
	the courts in any pending litigation related to the land or project,	
	in any court of law.	

57	The mining operation shall be restricted to above ground water	Will b	е	
	table and is should not intersect ground water table.	complied		

The project proponent will restrict its mining operations above the ground water table.

58	All vehicle used for transportation and within the mine shall have							Complied	
	"PUC"	certificate	from	authorized	pollution	taking	center.		
	Washing of all vehicles shall be inside the lease area.								

Compliance:

As part of reduce air pollution, the project proponent is monitoring the pollution level of all vehicles playing in the project site. This monitoring conducts only in authorized pollution testing center.

59	Project proponent should obtain necessary prior permission of	Noted
	the competent authorities for drawl of requisite quantity of	
	surface water and ground water for the project.	

Compliance:

At present, the need of prior approval is not necessary to draw ground water and surface water for the project.

Compliance:

There is no stream or springs flowing in and around to the mine lease area. The project proponent will install de-siltation trap and other mechanism to prevent sediments and wastes from the mining area to the public drainage system.

61	Occupational health surveillance program of the workers should	Complied	
	be under taken periodically to observe any contractions due to		
	exposure to dust and take corrective measures, if needed.		

The project proponent has started an occupational health surveillance program for the labours working in mining area in association with Primary Health center.

ENVIRONMENTAL CLEARANCE NO.15/2017

Mr.K.V.Abraham, Managing Partner, Thomsun Estates, Chempakapara, Erumely P.O, Kottayam District -686 509 vide his application received on 27/10/2015, has sought Environmental Clearance under EIA Notification, 2006 for the quarry project in Sy. No.120/1-23 at Erumely South Village, Erumely Panchayath, Kanjirappally Taluk, Kottayam District, Kerala for an area of 4.23 hectares. The project comes under Category B, Activity 1(a), (i) as per the Schedule of EIA Notification 2006 (since it is below 50 hectares) and as per O.M. No. L-11011/47/2011-IA.II(M) dated 18th May 2012 of Ministry of Environment and Forests. It is further categorized as Category B2 as per the O.M. No. J-13012/12/2013-IA-II (I) dt. 24.12.2013 of Ministry of Environment and Forests, since the area of the project is below 25 hectares.

The proposed project site falls within Latitude 9028'22.26'N to 9028'31.19"N and Longitude 76051'12.47"E to 76051'22.71"E. The land use classification as per revenue records is private own land. The lease area consists of 4.23 hectares. The current proposal is

Page 1 of 14

for the new building stone quarry project. The proposed project is for quarrying of 1, 50,000MTA of building stone. The Other details are as follows;

	I. Project details				
1.	File No. 963 / SEIAA / EC4 / 4473 / 2015				
2.	Name /Title of the project	M/s Thomsun Sands & Metals			
3.	Name and address of project proponent.	Mr. K.V. Abraham, Managing Partner, M/s Thomsun Sands & Metals, Thomsun Estates, Chempakapara, Erumely P.O., Kottayam District, Kerala-686509			
4.	Owner of the land	Private Own Land			
5.	Survey No. District/Taluk/ and Village etc.	Survey Nos. 120/1-23, Erumely South Village, Erumely Panchayat, Kanjirappally Taluk, Kottayam District, Kerala			
6.	Nature of the proposal – lease or permit with evidence.	New Quarry Project			
7.	Date of submission of Application	27-10-2015			
8.	Brief description of the project.	Quarry project with an area of 4,23 hectares. & Production capacity 1,50,000 MTA			
9.	Details of Authorized Signatory and address for correspondence	M/s Thomsun Sands & Metals, Mr. K.V. Abraham, Managing Partner Thomsun Estates, Chempakapara, Erumely P.O., Kottayam District, Kerala-686509 II. Land Details			
10.	a) Extent of area in hectares	4.23 hectares			
11.	b) Is the property forest land/Govt. land/own land/patta land	Private own land			
12.	c) Quantity of top soil/over burden produced and managed	Topsoil :15,015 cu. m. Överburden : 5,460 cu. m			
13.	d) Latitude and Longitude	Latitude (N) 09°28'22.26"N to 09°28'31.19"N Longitude (E) 76°51'12.47"E to 76°51'22.71"E			
14.	e) Topography of land and elevation	Part of the proposed land is exposed rock and there is no vegetation in that area. Some part of the proposed land is covered with native trees, shrubs, herbs, grass, climbers, bushes etc. The highest elevation of the lease area is 195 m. MSL and lowest is 130 m MSL. As the proposed area is low height hillocks, the drainage of the lease area is towards North-West. No habitants are located in the lease area			
15.	f) Slope analysis	Slope: towards North-West

		Air Mining activities will generate certain quantities of dust during drilling, blasting, loading and
38. Mai	nagement Plan	transportation operations. The following measures will be taken to mitigate the fugitive dust from different operations. Laying of haul road as per the standards, black topping of permanent haul road and service road to avoid or eliminate air — borne dust. To avoid the dust generation from the drilling operations, wet drilling method will be adopted. Drill machines will be equipped with dust collectors. Use of appropriate explosives for blasting and avoiding overcharging of blast holes. Controlled blasting techniques will be adopted. Watering of haul road and other road at regular intervals. Provision of dust filters/ mask to workers working at highly dust prone and affected areas. Provision of green belt all along the periphery of the lease area. Periodical monitoring of ambient air quality in and around the lease area. The extracted mineral will be transported from the quarry to the end user by adopting following measures so as to minimize dust emissions. In case of long transportation the trucks after loading will be covered with tarpaulin sheets.

Page **4** of **14**

_					
				Speed of the vehicles will be maintained within the prescribed limits. Trucks will not be over loaded and will be maintained	
			Water Pollution	to the body level. Provision of a storm water collection pond of total capacity about 8,000 KL. The water requirement for	
:		*	,	sprinkling on sources of dust emission, on roads, landscaping etc. can be met from the stored rainwater in the pond.	
			Noise	The major noise generating source from the proposed activity is working machinery, drilling, blasting and plying of vehicles. The following control measures are	
				to be undertaken to bring down the noise levels:- > Proper maintenance of machinery, equipments and improvement on design of machines. > Use of personal protective devices i.e., earmuffs	ı.
			3	and earplugs by workers, who are working in high noise generating areas. > Creation of wide green belt of dense foliage	
	5		8	between mine areas and residential colonies. related health problems Proper training to personnel to create awareness	
				about adverse noise level effects. > Planned noise monitoring at suitable locations in the plant and outside location for proper effective remedial actions.	
Ì			Solid Waste Management	Topsoil Management	3
U*-	(8)		Management	is proposed to be removed during the mining operations. The topsoil excavated from the quarry will be dumped separately at pre-determined place and	
	į			subsequently will be utilized in spreading over reglaimed areas for plantation. Precautions will be taken to limit the height of the topsoil dump to 5 to 6 meters in order to preserve its fertility and shelf life. It	
ş .				will be suitably protected from soil erosion and infertility by planting fodder grass and leguminous plants during temporary storage.	
	G.			Overburden Management About 5,460 cu. m of overburden will be generated throughout the mine life. This waste will be utilized within the pit for lying of haul roads. At the end use,	
			Eco- restoration	OB can be reutilized as soil base for plantation The year wise programme of eco-restoration for the life of mine, about 2,750 trees will be planted in an	
				area of 2.7581 ha. The main aim of the green belt development is to restore the eco-system to its original form to a maximum extent by designing the green

2. The proposal was considered in the 58th meeting of SEAC held on 28th& 29th June, 2016. The minutes of the said meeting are as follows; Further to the intimation of SEAC, the proponent along with the RQP was present in the meeting and RQP made a power point presentation of the salient features of the project. The committee appraised the proposal based on the mining plan, pre-feasibility report and all other documents submitted along with the Form I application and decided to **defer** the item for site visit.

Field visit to the quarry project site of M/S Thomsun Sands and Metals, Erumely Village, Kanjirappaly Taluk, Kottayam district, Kerala was carried out on 30.08.2016 by Sri. John Mathai, Member, SEAC along with Dr. K. Sreedharan from DoECC. The representatives of the proponent were present at the site at the time of site visit.

Page 11 of 14

The project is located at about 1.5 km south-east of Erumeli centre. This quarry lease area form part of a hillock exposing hard rock falling entirely within the land of Thomsun Estates. The approach road is through the unsurfaced estate road. Boundary pillars of this plot are erected and numbered displaying GPS values. In the area proposed for quarry is an elevated ridge with overall slope to NW. This is an uncultivated land that exposes hard rock with few patches of OB and top soil of variable thickness. Rubber plantation is the dominant landuse all around. The storm water flows as sheet flow reaching Erumelitodu located on the western side. Dwelling units are not seen within 100 m. Other quarries are not seen within 500 m.

The quarry may be recommended for EC after considering the following points:-

- 1) The entire area proposed for quarry should be fenced all around.
- 2) The limited top soil and OB need proper storage area on the lower part and provided with protective walls.
- 3) The approach road needs widening and surfacing even though it is located within the estate.
- 4) The limited patch of natural vegetation seen in the upper part adjacent to the proposed lease area should be preserved as such.
- 5) A small plot should be set apart for the rehabilitation of rare plants seen in the area.
- 6) The entire quarry should be provided with catch water drain all around. The storm water from the upper slopes to be channelized into the drain and clarified before it is let out.
- 7) A RWH structure should be created for the storage of rain water.
- 8) The area planned for crusher is located in the valley. The water draining out through this area should also be clarified before it is let out.
- 9) Details of CSR to be provided as promised in the SEAC meeting.
- 3. The proposal along with field visit report was again placed in the 62nd SEAC meeting held on 6th& 7th September 2016. The Committee after examining the mining plan, prefeasibility report, field inspection report by Sri. John Mathai and all other documents submitted, decided to Recommend for issuance of EC subject to general conditions along with the following specific conditions.
 - 1) Should be fenced all around.
 - The approach road needs widening and surfacing even though it is located within the estate.
 - 3) The limited patch of natural vegetation seen in the upper part adjacent to the proposed lease area should be preserved as such.
 - 4) A small plot should be set apart for the rehabilitation of rare plants seen in the area.
 - 5) The entire quarry should be provided with catch water drain. The storm water from the upper slopes to be channelized into the drain and clarified before it is let out.
 - 6) A RWH structure should be created for the storage of rain water.

Page 12 of 14

The proponent agreed to set apart Rs 9 lakhs (non-recurring) and 13 lakhs (recurring) per year for a period of next 5 years for the welfare of the local community. The proponent also agreed to spend this amount in consultation with the local Panchayath.

- 4. The proposal was considered by the Authority in its 60th meeting held on 27.10.2016. The Authority resolved to issue Environmental Clearance on condition that quarrying should be started only after fulfilling the pre mining specific conditions No. 1, 2 and 4. An affidavit should be given for this.
- 5. The Proponent submitted the affidavits stating that the premining conditions No.1, 2 & 4 have been fulfilled before starting with mining. Environmental clearance as per the EIA notification 2006 is hereby accorded for the proposed Quarry project of Mr.K.V.Abraham, M/s Thomsun Sands & Metals Pvt. Ltd, Managing Partner, Thomsun Estates, Chempakapara, Erumely P.O, Kottayam District -686 509 in Survey No. 120/1-23 at Erumely South Village, Erumely Panchayath, Kanjirappally Taluk, Kottayam District, Kerala for an area of 4.23 hectares, subject to the specific conditions as recommended by SEAC in para 3 above, all the environmental impact mitigation and management measures undertaken by the project proponent in the Form I, EMP, PFR and Mining plan submitted to SEIAA. The assurances and clarifications given by the proponent will be deemed to be a part of these proceedings as if incorporated herein. Also the general conditions for projects stipulated for mining, appended hereto will be applicable and have to be strictly adhered to.
- 6. The clearance issued will also be subject to full and effective implementation of all the undertakings given in the application form, initigation measures as assured in the Environment Management Plan and the mining features uncluding progressive mine closure plan as submitted with the application and relied on for grant of this clearance. The above undertakings and conditions and the undertakings subject to all the mining features, Environmental Management Plans as undertaken in the Mining Plan and EMP submitted to SEIAA will be deemed to be part of this proceedings as conditions as undertaken by the proponent, as if incorporated herein.
- 7. Validity of the Environmental Clearance will be five years from the date of this clearance, subject to inspection by SEIAA on annual basis and compliance of the conditions, subject to earlier review of E.C in case of violation or non-compliance of conditions or genuine complaints from residents within the security area of the quarry.
- 8. Compliance of the conditions herein will be monitored by the State Environment Impact Assessment Authority or its authorised offices and also by the regional office of the Ministry of Environment & Forests, Govt. of India, Bangalore.
 - Necessary assistance for entry and inspection should be provided by the project proponent and those who are engaged or entrusted by him to the staff for inspection or monitoring.
 - ii. Instances of violation if any shall be reported to the District collector,

STATE ENVIRONMENT IMPACT ASSESSMENT AUTHORITY KERALA

GENERAL CONDITIONS (for mining projects)

- Rain Water Harvesting facility should be installed as per the prevailing provisions of KMBR / KPBR, unless otherwise specified.
- 2. Environment Monitoring Cell as agreed under the affidavit filed by the proponent should be formed and made functional.
- 3. Suitable avenue trees should be planted along either side of the tarred road and open parking areas, if any, including of approach road and internal roads.
- Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.
- Sprinklers shall be installed and used in the project site to contain dust emissions.
- 6. Eco-restoration including the mine closure plan shall be done at the own cost of the project
- 7. At least 10 percent out of the total excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with indigenous plant species that are eco-friendly, if no other specific condition on reclamation of pit is stipulated in the E.C.
- 8. Corporate Social Responsibility (CSR) agreed upon by the proponent should be implemented
- 9. The lease area shall be fenced off with barbed wires to a minimum height of 4ft around, before starting of mining. All the boundary indicators (boards, stores, markings, etc) shall be protected at all times and shall be conspicuous.
- Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged as per stipulations of Explosive Department.
- 11. Control measures on noise and vibration prescribed by KSPCB should be implemented.
- 12. Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.
- 13. Blasting should be done in a controlled manner as specified by the regulations of Explosives Department or any other concerned agency.
- 14. A licensed person should supervise/ control the blasting operations.
- 15. Access roads to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.
- Overburden materials should be managed within the site and used for reclamation of mine pit as per mine closure plan / specific conditions.
- 17. Height of benches should not exceed 5 m, and width should not be less than 5 m, if there is no mention is the mining plan/specific condition.
- 18. Mats to reduce fly rock blast to a maximum of 10 PPV should be provided.
- 19. Maximum depth of mining from general ground level at site shall not exceed 10m
- 20. No mining operations should be carried out at places having a slope greater than 45°.
- 21. Acoustic enclosures should have been provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers so that the noise level is kept within prescribed standards given by CPCB/KSPCB.
- The workers on the site should be provided with the required protective equipment such as ear muffs, helmet, etc.
- 23. Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.
- 24. The transportation of minerals should be done in covered trucks to contain dust emissions.
- 25. The proponent should plant trees at least 5 times of the loss that has been occurred while clearing the land for the project.
- 26. Disposal of spent oil from diesel engines should be as specified under relevant Rules/Regulations.
- Explosives should be stored in magazines in isolated place specified and approved by the Explosives Department.
- 28. A minimum buffer distance of 100 m from the boundary of the quarry to the nearest dwelling unit or other structures, not being any facility for mining shall be provided.
- 29. 100 m buffer distance should be maintained from forest boundaries.

- Consent from Kerala State Pollution Control Board under Water and Air Act(s) should be obtained before initiating mining activity.
- 31. All other statutory clearances should be obtained, as applicable, by project proponents from the respective competent authorities including that for blasting and storage of explosives.
- 32. In the case of any change(s) in the scope of the project, extent quantity, process of mining technology involved or in any way affecting the environmental parameters/impacts as assessed, based on which only the E.C is issued, the project would require a fresh appraisal by this Authority, for which the proponent shall apply and get the approval of this Authority.
- 33. The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
- 34. The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and control of Pollution) act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.
- 35. The project proponent should advertise in at least two local newspapers widely circulated in the region, one of which (both the advertisement and the newspaper) shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the State Environment Impact Assessment Authority (SEIAA) office and may also be seen on the website of the Authority at www.seiaakerala.org. The advertisement should be made within 10 days from the date of receipt of the Clearance letter and a copy of the same signed in all pages should be forwarded to the office of this Authority as confirmation.
- 36. A copy of the clearance letter shall be sent by the proponent to concerned Grama Panchayat/ District Panchayat/ Municipality/Corporation/Urban Local Body and also to the Local NGO, if any, from whom suggestions / representations, if any, were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.
- The proponent shall submit half yearly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the respective Regional Office of MoEF, Govt. of India and also to the State Environment Impact Assessment Authority (SEIAA) office.
- 38. The details of Environmental Clearance should be prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman font of size of not less than 40. Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public
- 39. The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.
- 40. No change in mining technology and scope of working should be made without prior approval of the SEIAA, No further expansion or modifications in the mine shall be carried out without prior approval of the SEIAA, as applicable.
- 41. The Project proponent shall ensure that no natural water course and/or water resources shall be obstructed due to any mining operations. Necessary safeguard measures to protect the first order streams, if any, originating from the mine lease shall be taken.
- 42. Monitoring of Ambient Air Quality to be carried out based on the Notification 2009, as amended from time to time by the Central Pollution Control Board. Water sprinkling should be increased at places loading and unloading points & transfer point to reduce fugitive emissions.
- 43. The top soil, if any, shall temporarily be stored at earmarked site(s) only for the topsoil shall be used for land reclamation and plantation. The over burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only. The maximum height of the dumps shall not exceed 8m and width 20m and overall slope of the dumps shall be maintained to 45°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the dump. The entire excavated area shall be backfilled. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.

- 44. Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly.
- 45. Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of PM₁₀ and PM_{2.5} such as haul Road, loading and unloading points and transfer points it shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central Pollution Control Board in this regard.
- 46. Fugitive dust emissions from all the sources should be controlled regularly. Water spraying arrangement on haul roads, loading and unloading and at transfer points should be provided and properly maintained.
- 47. Measures should be taken for control of noise levels below 85 dBA in the work environment.
- 48. A separate environmental management cell with suitable qualified personnel should be set-up under the control of a Senior Executive, who will report directly to the Head of the Organization.
- 49. The funds earmarked for environmental protection measures and CSR activate should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the State Environment Impact Assessment Authority (SEIAA) office.
- 50. The Regional Office of MOEF & CC located at Bangalore shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (S) of the Regional Office by furnishing the requisite data/information/monitoring reports.
- 51. Any appeal against this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act. 2010.
- 52. Concealing the factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
- 53. The SEIAA may revoke or suspend the order, for non implementation of any of the specific or this implementation of any of the above conditions is not satisfactory. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
- 54. The above conditions shall prevail not withstanding anything to the contrary, in consistent, or simplified, contained in any other permit, license on consent given by any other authority for the same project.
- 55. This order is valid for a period of 5 years or the expiry date of mine lease period issued by the Government of Kerala, whichever is earlier.
- 56. The Environmental Clearance will be subject to the final order of the courts in any pending litigation related to the land or project, in any court of law.
- 57. The mining operation shall be restricted to above ground water table and it should not intersect ground water table.
- All vehicles used for transportation and within the mines shall have 'PUC' certificate from authorized pollution taking centre. Washing of all vehicles shall be inside the lease area'
- 59. Project proponent should obtain necessary prior permission of the competent authorities for drawal of requisite quantity of surface water and ground water for the project.
- 60. Regular monitoring of flow rates and water quality upstream and downstream of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six monthly reports to SEIAA.
- 61. Occupational health surveillance program of the workers should be under taken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.

For Member Secretary, SEIAA Kerala
